Dear Casanda,

This letter is to provide information regarding the regulatory status of S6069060, 050ED0072040SC.

Regulation of Contents

SDS Sheets

While we maintain an SDS on file for each of the water-based adhesives in raw wet form, the finished label product that we provide, including the dried adhesive, is considered an "article" as defined by OSHA, 29 CFR 1910.1200, Section (c). As such these articles do not release or otherwise result in exposure to hazardous chemicals under normal conditions of use.

We are unaware of any potential sources for the introduction of any substances listed in the regulations from the manufacturing and packaging processes utilized, nor from the components themselves. Green Bay Packaging does not specifically test for the presence of the chemistries listed in these regulations. Therefore, we cannot guarantee the level of these substances to any specific limit or threshold value.

The above confirmations are for Green Bay Packaging pressure-sensitive laminations as delivered. This information is provided in good faith and is believed accurate as of the date of this letter based on review of current composition and information supplied by vendors. All of the above uses are subject to good manufacturing practices and any limitations that are part of the above regulations. No warranty is expressed or implied. Liability is expressly disclaimed.

Sincerely,

Rory Brecke
Technical Services Manager
